The bund of the above tank is fully covered with juliflora jungle and top levels are far below the TBL and slopes are eroded badly. The LF sluice is having no head wall and bungs formed at LF sluice. The Irrigation Channel banks of Sluice No.2 are badly damaged in the head reaches and require guide walls. The existing guide walls to IC No.3 are badly damaged and leaking heavily which require reconstruction. The pipe culvert on IC No.4 is badly damaged and it requires reconstruction. Due to this, water is entering the fields and causing loss to crops. Hence, farmers are requesting for permanent CC guide walls. The Chief Engineer, Minor Irrigation, has proposed to construct guide walls at vulnerable reaches only. Further, he has stated that an amount of Rs.61,750/- required for the component of jungle clearance is proposed to be taken up under MGNREGP.
